

ASSIGNMENT 2 dt. 29.10.23

DSA 0165 OOPS USING C++

NAVEEN A S 192110141

Question 1:

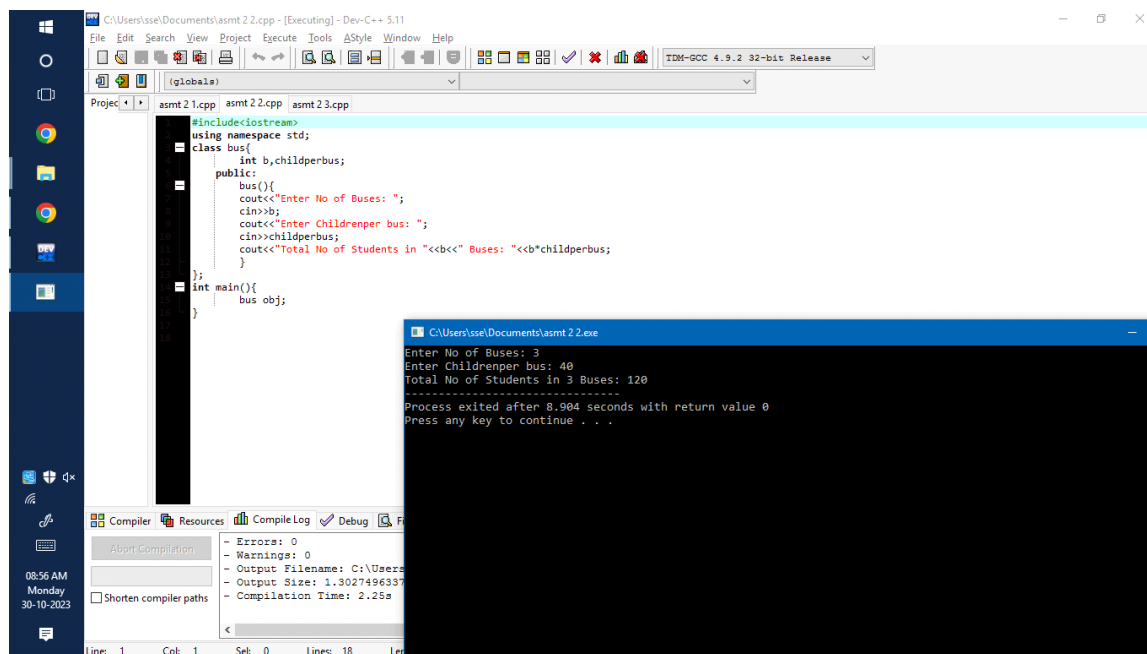

```
#include<iostream>
using namespace std;
int main(){
    int p1,p2,p3,p4,old,p;
    cout<<"Enter age of Painting 1:"<<cin>>p1;
    cout<<"Enter age of Painting 2:"<<cin>>p2;
    cout<<"Enter age of Painting 3:"<<cin>>p3;
    cout<<"Enter age of Painting 4:"<<cin>>p4;
    if(p1>p2 && p1>p3 && p1>p4){
        old = p1;
        p = 1;
    }
    else if(p2>p1 && p2>p3 && p2>p4){
        old = p2;
        p = 2;
    }
    else if(p3>p1 && p3>p2 && p3>p4){
        old = p3;
        p = 3;
    }
    else{
        old = p4;
        p = 4;
    }
    cout<<"Painting "<<p<<" is the oldest Painting with "<<old<<" Years Age!";
}
```

Output:

```
Enter age of Painting 1:4200
Enter age of Painting 2:8500
Enter age of Painting 3:1000
Enter age of Painting 4:1300
Painting 2 is the oldest Painting with 8500 Years Age!
Process exited after 26.56 seconds with return value 0
Press any key to continue . . .
```

Question 2:

```
#include<iostream>
using namespace std;
class bus{
    int b,childperbus;
public:
    bus(){
        cout<<"Enter No of Buses: ";
        cin>>b;
        cout<<"Enter Childrenper bus: ";
        cin>>childperbus;
        cout<<"Total No of Students in "<<b<<" Buses: "<<b*childperbus;
    }
};
int main(){
    bus obj;
}
```

Output:

```
Enter No of Buses: 3
Enter Childrenper bus: 40
Total No of Students in 3 Buses: 120
Process exited after 8.984 seconds with return value 0
Press any key to continue . . .
```

Question 3:
